SPHERO™ AccuCount Particles

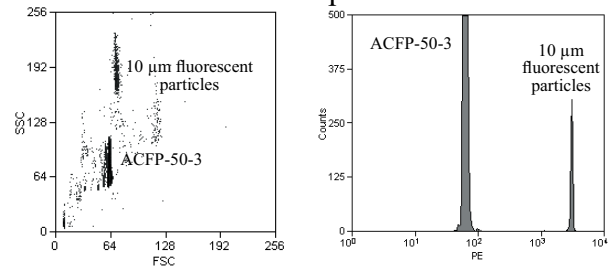

The SPHERO™ AccuCount Particles are designed to be used as reference particles with known number of particles per mL for counting the absolute cell number by flow cytometry. The SPHERO™ AccuCount Particles are very easy to use and are cost effective. The AccuCount Fluorescent Particles are fluorescent in FITC, PE and PE-Cy5, and APC channel. Both AccuCount Fluorescent and AccuCount Blank (nonfluorescent) Particles are available in 5, 7 and 10 μm particles size to accommodate the size of the cells to be counted. The AccuCount Rainbow Fluorescent Particles contain the same fluorophores as the Rainbow Calibration Particles and have a 10 μm particle size.
